

HAND RAIL GRIP TAPE

UKT176BLK50

Ref	TS1892
Date	Dec 2014
Pages	1 of 1

DESCRIPTION

Premium quality, self-adhesive tape with textured, slip-resistant surface for hand rails.

Made from a tough, waterproof PVC layer and a PET underlamine, the tape offers an aesthetically pleasing covering which complies with the UK Building regulations of requiring hand rails to be “slip resistant” and not “cold to the touch”.

The symmetrically dimpled finish is not harsh to bare hands and can be easily cleaned.

INSTRUCTIONS / USES

Creates a non-slip surface for hand rails.

INSTALLATION : Ensure the hand rail is clean, dry and free from grease or other contaminants. Remove the backing paper and apply the tape with even pressure across its width. Ensure the edges are firmly adhered.

The tape can be applied along the length of the hand rail or wrapped at an angle (like a tennis racquet). Of course, if preferred, we can produce the exact width you require based on the circumference of your hand rails.

BENEFITS / KEY FEATURES

- > Premium quality
- > High grip yet soft to the touch
- > Excellent insulation properties to prevent the hand rail from feeling cold
- > Aesthetically pleasing, dimpled pattern

TECHNICAL INFORMATION

COLOURS	TAPE WIDTH	ROLL LENGTH
Black	50mm (other sizes on request)	18M
TAPE THICKNESS	ADHESIVE	CORE
900mu (0.90mm)	Solvent Acrylic	76mm diameter cardboard core
TEMPERATURE RANGE	SHELF LIFE	ADHESION TO STEEL
-10°C to +50°C	12 months	5.7 Kg /25mm ²
